

Taught Course: Critical Care in Surgical Practice
2.00pm – 5.30pm, Thursday 19th April 2007

A half day update in critical care practice for the general surgeon conducted by experienced faculty renowned for their enjoyable and informative courses.

Featuring:

- Case scenarios
- Expert panel discussion
- Practical management issues
- Tips and tricks from experts in the field
- New approaches and controversies
- Opportunity for questions and interaction

The course will provide an update on contemporary issues in surgical critical care and the management of the critically ill surgical patient on the ward, HDU and ICU. The focus will be very much on “what the surgeon needs to know and do”.
